## **BOOK SYNOPSIS**

Are you nervous about learning to drive? Are you a parent or instructor who is nervous and worried about being driven by a learner driver? This defensive driving text is for learners to study as well as instructors, parents or friends who wish to know 'how and what' to correctly and safely teach in 4 easy lessons. Some time ago I read that the 17 to 25 year age group only make up 15% of our total population but account for a huge 35% to 40% of our road deaths. This statistic alone prompted me to write this book in an attempt to help parents to teach their children correctly and to give learner drivers a reference book so they will hopefully learn correctly from day one. This has been written in an easy to understand way, with many useful illustrations to assist, by former Australian Police Driving Instructor, Trevor Hobbs. The original paperback copy of this book (From L to P) sold 29,000 copies in Australia and was widely praised as one of the best defensive driver training books around. This has been formatted for optimal viewing on the iPad and other tablets. REMEMBER - 90% of all motor vehicle crashes are caused by human error. Teach your child to drive safely, and you could potentially save their life. There are two versions of this eBook: For driving on the left hand side of the road (Yellow Cover) and for driving on the right hand side of the road - Blue cover.
